Stock Market Today: Futures Fall On Trump Oil Remarks; Nvidia Plunges On New CEO Reports (Live Coverage)

Key TakeawaysVistra is down 17% in 2026 because Texas power prices stayed weak and Texas elected a governor who wants to pause new data centers. Constellation Energy has fallen even further this year, so part of the drop is a selloff across AI-power stocks, but Texas is Vistra’s own problem.

AGENDA DESK

Suggested Next Agenda

Source: Persisted questions and missing evidence

- Which recorded governance requirement must clear before AVGO can advance?
- If NVDA reaches the recorded price condition <= 213.27, which recorded evidence and governance requirements would still remain?
- Which recorded governance requirement must clear before QBTS can advance?
- Which recorded governance requirement must clear before PLTR can advance?
- Evidence agenda: DELL - No canonical symbol-specific material event is linked.
- Proposed review: Sentinel infrastructure state ONLINE - why it matters: operational freshness affects how much Joshua can trust external/context observations; would change Joshua's view: fresh validated Sentinel status returns before the market session.
- Proposed review: WOPR pipeline Collecting samples - why it matters: the active gate shows whether today's constraint is opportunity count, evidence quality, or calibration; would change Joshua's view: candidates begin clearing the current gate with stronger evidence.

NEXT READ

Watch: Pending order lifecycle - why it matters: Pending-order cancellations have trackable reasons and no obvious rapid churn pattern.; would change Joshua's view: canceled-order regret analysis shows protection or avoidable missed gains.
Question: Which recorded governance requirement must clear before AVGO can advance?
