Today's Market Weather: Balanced - Deterministic market-risk score 47/100 reflects volatility normal, risk appetite weak, breadth health narrow leadership, sentiment neutral, regime defensive rotation.

What Joshua should watch: DELL remains the leading internal review target; its evidence stack now separates candidate confidence from portfolio risk.
What changed since yesterday: 127 canonical metric change(s) are available; Sentinel is ONLINE; market is OPEN.

Benjamin Graham

Source: Columbia biography

- Created the intellectual foundations of value investing and security analysis.
- Published quotation: "The intelligent investor is a realist who sells to optimists and buys from pessimists."
- Published framework: Estimate intrinsic value from verifiable business facts, buy only at a meaningful discount, diversify, and use the margin of safety to protect against analytical error and an uncertain future.
- Committee lens: Graham forces valuation discipline: what evidence supports intrinsic value, where is the margin of safety, and how badly could the estimate be wrong?
- Public philosophy profile only; no participation, endorsement, or current recommendation is implied.

- Which recorded governance requirement must clear before QBTS can advance?
- If XRAY reaches the recorded price condition <= 9.29, which recorded evidence and governance requirements would still remain?
- Proposed review: Pending order lifecycle - why it matters: Pending-order cancellations have trackable reasons and no obvious rapid churn pattern.; would change Joshua's view: canceled-order regret analysis shows protection or avoidable missed gains.
- Proposed review: Sentinel infrastructure state ONLINE - why it matters: operational freshness affects how much Joshua can trust external/context observations; would change Joshua's view: fresh validated Sentinel status returns before the market session.
