COMMITTEE PROFILE

Mark Minervini

Source: Minervini biography

- Two-time U.S. Investing Championship winner and creator of the SEPA growth-trading framework.
- Published quotation: "Risk is a function of how much you can lose, not how much you can make."
- Published framework: Concentrate on fundamentally strong market leaders in established uptrends, enter only when volatility contracts into a precise low-risk setup, and keep losses small through predetermined stops and sizing.
- Committee lens: Minervini gives Joshua a precise entry-quality and risk-compression lens: a good company still needs a valid setup, controlled position risk, and clear exit rules.
- Public philosophy profile only; no participation, endorsement, or current recommendation is implied.

- Which recorded governance requirement must clear before AVGO can advance?
- If NVDA reaches the recorded price condition <= 222.1, which recorded evidence and governance requirements would still remain?
- Which recorded governance requirement must clear before QBTS can advance?
- Which recorded governance requirement must clear before PLTR can advance?
- Evidence agenda: DELL - No canonical symbol-specific material event is linked.
- Proposed review: Pending order lifecycle - why it matters: Pending-order cancellations have trackable reasons and no obvious rapid churn pattern.; would change Joshua's view: canceled-order regret analysis shows protection or avoidable missed gains.
- Proposed review: WOPR pipeline Learning present — untrusted - why it matters: the active gate shows whether today's constraint is opportunity count, evidence quality, or calibration; would change Joshua's view: candidates begin clearing the current gate with stronger evidence.
