Joshua Internal Status

Source: WOPR | Owner: Research Department

- WOPR learning pipeline: Healthy caution
- Candidates evaluated 24h: 694
- Current gate: Confidence/Evidence
- Notification ledger events in 24h: 20
- Pending orders created/canceled/filled/expired: 4/3/0/0
- Pending lifecycle interpretation: Many cancellations are missing a specific reason; review source fields before changing behavior.
- Portfolio risk: Label: Low / Score: 34.1
- Latest intelligence gap report: intelligence_gap_report_2026-07-05.pdf

Why This Matters: The active gate is Confidence/Evidence, so the key question is why candidates are stopping before approval, not how to force trades.

Sentinel Status

Source: Sentinel | Owner: Infrastructure Observer

- Sentinel role: infrastructure and operational status only.
- State: ONLINE
- Last successful validation: unknown
- Payloads accepted/rejected: unknown/unknown
- Node health score: 96

Why This Matters: Sentinel is ONLINE, so Joshua should use its context only to the extent the latest accepted pulse is fresh and authenticated.

Best Opportunities

Source: Joshua | Owner: Senior Analyst

Joshua currently favors MARA because it is the highest-ranked available internal opportunity from Portfolio Intelligence.
Candidate confidence: 41.4
Portfolio risk: Label: Low / Score: 34.1
Supporting evidence: WOPR history: 4941 scored sample(s), 77.4% win rate. / MARA lowers risk while preserving upside.
Contradicting evidence: none captured
Missing evidence: Current symbol-specific prediction confidence is unavailable. / Canonical symbol-specific price context is unavailable in the core snapshot. / Authoritative market breadth is unavailable. / No canonical symbol-specific material event is linked.
Invalidation conditions: Candidate confidence or portfolio-fit evidence deteriorates materially.
Why it matters: MARA is an observation-only review target, not an instruction; Joshua should compare its evidence stack against market context and recent gate failures.

Why This Matters: A top setup earns attention, not automatic allocation; the brief should help Joshua decide what evidence is missing.
